EJBCA Enterprise 7.6 released!

2021-07-14 - Younes Javan Chari - 0 Comments - in PrimeKey Release Information

The PrimeKey EJBCA team is pleased to announce the release of EJBCA 7.6.0.

This release continues this spring's push to develop EJBCA as the preeminent solution for Enterprise PKIs, with further integration with Microsoft PKIs. It also brings to light External Account Bindings, an important concept for anybody needing to handle large volumes of device certificates. Included in this release are also the changes made in EJBCA 7.5.1, which was only released internally.

Deployment options include [EJBCA Hardware Appliance](#), [EJBCA Software Appliance](#), and [EJBCA Cloud](#).

Release highlights include:

- External Account Bindings
- Microsoft Intune Revocation and Other Improvements
- Microsoft Azure Managed HSM (MHSM)
- Testing Baseline raised to JDK11

Compliance:

- Compliance with CA/Browser Forum Ballot SC44

Security:

- General Purpose Custom Publisher able to Run Despite External Scripts Being Disabled
- Enrollment Secrets Logged in Audit Log
- Enrollment Secrets Reflected in UI

- CMP Revocation Ignores Multi Tenancy Constraints
