EJBCA SaaS 1.0 Released!

2020-12-11 - Rubina Akram - 0 Comments - in PrimeKey Release Information

PrimeKey is pleased to announce the very first release of EJBCA SaaS version 1.0.

EJBCA SaaS provides you with the full power of EJBCA Enterprise, but without the need for managing the underlying infrastructure. Set up your EJBCA instance on AWS, and PrimeKey makes sure that your PKI infrastructure is managed according to best practices and with the highest assurance. Choose your preferred subscription, leverage the elasticity and global presence of the service as you scale your infrastructure, and rest assured that you will have a guaranteed SLA that you will not have to maintain.

Release highlights include:

- Instant Subscription and On Demand Provisioning
- EJBCA SaaS Subscription Options
- PrimeKey SaaS Portal
- Private Keys Stored Securely in AWS KMS
- Dedicated Offline Root CA
- No Vendor Lock-in
- Non-Prod Included with Medium Sized Deployments
