EJBCA Security Advisory - EJBCA not affected by CVE-2020-28052

2020-12-21 - Mike Agrenius Kushner - 0 Comments - in PrimeKey Announcements

A CVE ([CVE-2020-28052](#)) has been reported for BouncyCastle, the cryptography library used by EJBCA.

This does not present a vulnerability in EJBCA, as it affects versions 1.65 and 1.66 of the library, while EJBCA runs version 1.67. In addition to that, the affected code is not referenced by EJBCA.
