SignServer Enterprise 5.6.0 Released!

2021-02-26 - Rubina Akram - 0 Comments - in PrimeKey Release Information

The PrimeKey SignServer team is pleased to announce the release of SignServer Enterprise 5.6.0.

With this release, we are introducing support for request prioritization, allowing incoming signing requests to be assigned different priority levels based on configuration. This release also brings support for Authenticode resigning, enabling signing of Microsoft Authenticode signed PE and MSI files with an additional signature.

Deployment options include [SignServer Hardware Appliance 3.5.8](#) and [SignServer Cloud](#).

Release highlights include:

- Request Prioritization
- Authenticode Resigning
