SignServer Enterprise 5.7 Released!

2021-08-10 - Rubina Akram - Comments (0) - PrimeKey Release Information

The PrimeKey SignServer team is pleased to announce the release of SignServer Enterprise 5.7.

This release introduces support for PAdES and XAdES signature formats including all ETSI Baseline levels complying with EU eIDAS regulation for Advanced Electronic Signatures.

In the code signing area, SignServer 5.7 adds support for Microsoft CAB file signing. Further, the RSASSA-PSS algorithm is now supported for use with client-side hashing, relevant for firmware signing use cases, among others.

Deployment options include [SignServer Hardware Appliance](#) and [SignServer Cloud](#).

Release highlights include:

- PAdES Signature Format
- XAdES Signature Format
- Microsoft CAT File Signing
- RSASSA-PSS with Client-Side Hashing Supported in P11NG

Announcements:

- Deprecation of Java SE 8 as Runtime Environment
