SignServer Enterprise 5.8.1 Released!

2021-12-16 - Rubina Akram - Comments (0) - PrimeKey Release Information

The PrimeKey SignServer team is pleased to announce the release of SignServer Enterprise 5.8.1.

This release includes a new feature where signature requests can be signed by a remote client allowing a new end-to-end authorization mechanism for deployment scenarios with proxies or similar between the client and the server. The release also addresses two security issues and customers are advised to upgrade to this version as soon as possible.

Deployment options include [SignServer Hardware Appliance](#) and [SignServer Cloud](#).

Release highlights include:

- Signed Signature Requests

Security Notice:

- Third-party Apache Santuario Library Upgrade (CVE-2021-40690)
- Cross-site Scripting Issue in Admin Web
