SignServer Enterprise 5.9.0 Released!

2022-04-27 - Rubina Akram - Comments (0) - PrimeKey Release Information

The SignServer team is pleased to announce the release of SignServer 5.9. This release adds support to optionally use a Keyfactor branded web interface. The support for Android signing in cloud deployments has also been improved. SignServer 5.9 uses upgraded versions of the Log4j and OpenPDF libraries.

Included in this release are also the changes made in SignServer 5.8.2, which was only released internally.

Deployment options include [SignServer Hardware Appliance](#) and [SignServer Cloud](#).

Release highlights include:

- Keyfactor branded Web Interface
- Android Signing Improvements for Cloud Deployments
- Log4j Upgrade

Upgrade Information:
